

CASE STUDIES - TURKEY

FAHRIYE BAKİT

10th GRADE STUDENT - NAHİTMENTEŞE
TURKEY

Hello! My name is Fahriye Bakit. I'm a shy girl and I have difficulty in communicating with my friends and teachers. I feel anxious about asking questions to my teachers when I can't understand the subject and this decreases my success till I meet Cooperative Learning. In English Lessons our teacher used this method which was new for us. We all enjoyed learning the subject in Cooperative way. We were all active during the lesson. Each of us had different responsibilities in the group and this made me feel valuable. Day by day I felt more self-confident and sociable. With the help of the project, I see that I can communicate with my friends and teachers easily, I feel free about asking questions to my teachers. I start to get higher grades in English Lessons. I'm happy that my teacher used this technique with the help of the project

EBRU AKÇA

ENGLISH TEACHER - NAHİTMENTEŞE
TURKEY

Hi! My name is Ebru Akça. I've been working at this school for two years as an English Teacher. Some of the students in my classes have absenteeism problem. I tried to use different techniques on this classes and Cooperative Learning is one of them. I integrated different techniques of Cooperative Learning with the help of InSchool Project. Both I and my students enjoyed lessons a lot and I discover that the students with absenteeism problem were all in the class and involve more actively in the lesson. It was fantastic to see them all have fun, eager to learn and have good relations with their classmates. Thanks to InSchool Project for giving me the chance to provide a warmer learning environment for my students in my classes.
